

WhiteVit

Whitening & Age Defying Secret

A French Clinical Formulation containing 100% Natural 500mg L-Glutathione for Skin Whitening and also for Slow Greying.

Each **WHITEVIT** Softgel Capsule assures L'-Glutathione 500mg of Korean Origin proven to be extremely beneficial for skin whitening. L-Glutathione Reduced is a naturally derived substance that is a biologically active sulfur amino tripeptide compound containing three amino acids: L-Cysteine, L-Glutamic Acid, and Glycine. WHITEVIT refers to the non-oxidized stable form of L-Glutathione.

• INDICATIONS

Detoxification, Amino Acid Transport, Brightens Rejuvenated Skin Cells, Restores the Function of Vitamin C & E, Lightens Acne Scars.

INGREDIENTS

• L-Glutathione (GSH)

Glutathione is the most abundant intracellular thiol (sulfur-containing compound) and low molecular weight tripeptide found in living cells. Thiols such as glutathione, alpha lipoic acid and NAC are powerful sulfur-bearing antioxidants.

GSH binds to Tyrosinase and helps prevent the enzymatic pathways from producing melanin. Also GSH helps to prevent the activation of Tyrosinase by reducing free radicals in the body that can activate it and cause an increase in melanin production.

Glutathione recycles oxidized lipoic acid, Vitamin C and E by restoring them to an active state, mostly by donating the electrons that they used in metabolizing (neutralizing) free radicals. Instead of this army of antioxidants flushed out, they are recycled by Glutathione and sent back out to work.

WhiteVit

L-Glutathione-500mg

1x10 Softgel Capsules

• DOSAGE

ORAL

1-2 SG a day For 12 weeks (along with 1000mg Vitamin C)

• SAFETY INFORMATION
